The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/633,187	Applicant(s) GREEN, CRAIG B.	
	Examiner Randy W. Gibson	Art Unit 2841	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Zoeke et al (US # 4,334,955). Zoeke disclose the claimed invention including a tray (10), a resilient leaf spring (18), and an empty container switch (22).

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Pearson (US # 5,307,250). Pearson discloses the claimed invention including a tray (10), a resilient coil spring (22), and an empty container switch (Col. 4, lines 30-40).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Susumu (US # 4,108,363) in view of Zoeke et al (US # 4,334,955) and Mairot et al (US # 4,582,151). Susumu disclose the claimed invention except the switch that trips when the shelf is near empty, and the slideable shelf. Susumu has a complex weighing mechanism instead of a weight activated switch; however, Zoeke shows that such a switch is known, and it would be less complex and less expensive to implement than a load cell equipped system. It would have been obvious to the ordinary practitioner to replace a complex load cell based system of Susumu with just a spring supported shelf and limit switch, such as the design of Zoeke, to produce a cheaper and simpler to install design.

As for the weighing device being on a slidable shelf, Mairot shows that this was known, and it would have been obvious to the ordinary practitioner in order to make the items more accessible to the shopper.
